

The I2MO mobile jib crane is equipped with a manual pump for vertically lifting loads located up to 1 meter in front of the wheels.

Its mobility allows it to be used anywhere in your workshop.

Like all of the mini-cranes developed by Mobilev Cranes, this mobile jib crane features an **anti-tipping device** and automatic brake to ensure safe operation.

Technical characteristics

Max. load	840 kg
Unloaded weight	550 kg
Overall length (with drawbar straight)	2,90 m
Overall width	0,80 m
Ground clearance	80 mm
2 dual rear wheels PU* 95 Shore	Ø 200 x 50 mm
2 swivel front wheels PU* 95 Shore	Ø 150 x 50 mm

Standard equipment

- I double-action manual hydraulic pump
with steel tank
- Fixed boom with 4 hook positions
- Hydraulic vertical mast with 600 mm travel
with counterbalance valve
- Anti-tipping device
- Automatic brake

Option

- Hand winch with automatic brake, max. SWL 340 kg with safety panel (audible alarm and warning light + battery + charger)

*PU: Non-marking polyurethane
